

Buncombe County Beekeepers Club Presents:

# Dr. Samuel Ramsey

## What's Killing the Bees? A Fresh Look

Come hear Dr. Samuel Ramsey talk on Saturday, Sept 1st at the Mountain Horticultural Crops Research & Extension Center at 455 Research Drive, Mills River, NC 28759 at 9:00 am to 12:00 noon. \$10/person.

Be ready to think outside the box with "Dr. Buggs."

We have always been taught that varroa mites (a parasitic mite) feed on hemolymph, or bee blood, but NO...and he will walk us through his detailed research that proves otherwise.

Hear a preview on YouTube: [Three Minute Thesis Winner Samuel Ramsey 2017 \(UMD\)](#). It will blow your mind!

Undergraduate schooling at Cornell University. Completed his PhD in 2018 with Dr. Dennis vanEngelsdorp at the University of Maryland. His current work focuses on the effects of honey bee parasites on individual and colony level survivorship specifically targeting Varroa destructor and Nosema ceranae.

Reserve your spot here:

<https://wncbees.org/event/dr-ramsey/>

or pay at the door

Please be on time as the talk will start at 9:00 am sharp.

You don't have to be a beekeeper to enjoy this talk!
